QUESTION NO: 1

A SOAP message is an XML document that is comprised of a set of pre-defined parts. Which of the following are parts that can be found in a SOAP message? SELECT ALL THAT APPLY

- A. Envelope
- B. Body
- C. Header
- D. Footer

ANSWER: A B C**QUESTION NO: 2**

SOAP messages contain headers that can be customized but are also used to implement industry-standard features provided by technologies, such as WS-Addressing. Select the correct answer.

- A. True
- B. False

ANSWER: A**QUESTION NO: 3**

The HTTP protocol can be used together with SOAP-based Web services and REST services. Select the correct answer.

- A. True
- B. False

ANSWER: A**QUESTION NO: 4**

Which of the following exist as XML documents? SELECT ALL THAT APPLY

- A. WSDL definition
- B. XSLT stylesheet
- C. XML schema

D. WS-Policy definition

ANSWER: A B C D

QUESTION NO: 5

Which of the following are industry standard technologies related to the processing of XML-based data? SELECT ALL THAT APPLY

- A. XData
- B. XQuery
- C. XSLT
- D. XWeb

ANSWER: B C

QUESTION NO: 6

Which of the following statements makes sense? Select the correct answer.

- A. I created a WS-BPEL process definition that composes 6 SOAP-based Web services, 2 of which also invoke other SOAP-based Web Services.
- B. I created a WS-BPEL process definition that establishes industry standard routing-related SOAP headers capable of routing six messages.
- C. I created a WS-BPEL process definition that establishes an industry standard framework for issuing positive and negative acknowledgements.
- D. None of these statements make sense.

ANSWER: A B D

QUESTION NO: 7

Which of the following XML documents can be part of a SOAP-based Web service contract? SELECT ALL THAT APPLY

- A. WSDL definition
- B. HTTP definition
- C. XML schema
- D. WS-Policy definition

ANSWER: A C D

QUESTION NO: 8

Identify what is wrong with the following statement: "I have a single Calculator component that provides basic math functions. I'm exposing this component as a component-based service for internal service consumers that are also component-based. I'm exposing this component as a SOAP-based Web service for internal and external service consumers that support SOAP messaging. I'm also exposing this component as a REST service for external service consumers that prefer to access its functions via HTTP methods. I'm also exposing this component as a service agent for service consumers that support explicit invocation via a service contract." SELECT ALL THAT APPLY

- A.** A single component cannot be exposed as a component-based service, a SOAP-based Web service and a REST service at the same time.
- B.** SOAP-based Web service consumer programs cannot be both internally and externally located.
- C.** The uniform contract required by REST services does not support the use of HTTP methods.
- D.** Service agents are event-driven and are therefore not explicitly invoked via a service contract.

ANSWER: D

QUESTION NO: 9

When two compatible SOAP-based Web services need to exchange an XML document that is compliant with the XML schema shared by both services, then: Select the correct answer.

- A.** A data model transformation technology, such as XSLT, must be used to enable the data exchange.
- B.** A new XML schema must be created to overcome the disparity between how each service defines the data model for the XML document.
- C.** A WS-Policy definition must be created to establish rules that address any differences in the XML document exchange.
- D.** None of the above.

ANSWER: D

QUESTION NO: 10

Like components, SOAP-based Web services can be developed using vendor tools. Unlike components, the communications framework established by SOAP-based Web services can be based on industry standards thereby remaining vendor-neutral. Select the correct answer.

- A.** True
- B.** False

ANSWER: A
