Topic Break Down

| Topic | No. of Questions |
|-------------------|------------------|
| Topic 1, Volume A | 61 |
| Topic 2, Volume B | 55 |
| Total | 116 |

QUESTION NO: 1

What is the scope of Disaster Recovery?

- A. fault tolerance within the data center for critical business processes
- B. moving the production environment to a backup data center
- C. replicating the storage systems to a backup data center
- D. high availability of the services in the data center

ANSWER: B**QUESTION NO: 2**

When is it appropriate to use a Mediation implementation type?

- A. when the interaction with an underlying service is asynchronous
- B. when each underlying service operation completes quickly
- C. when service operation might need human interaction
- D. when the underlying service is a REST service

ANSWER: B**QUESTION NO: 3**

According to TIBCO best practice recommendations, which three updates should be used to indicate incompatible changes to a service? (Choose three.)

- A. update the major release number in the WSDL and related XSD filenames
- B. update the major release number in the WSDL and related XSD namespace name
- C. update the queue name or URL through which the service is addressed
- D. update the major release number in the version tag in the message header

ANSWER: A B C

QUESTION NO: 4

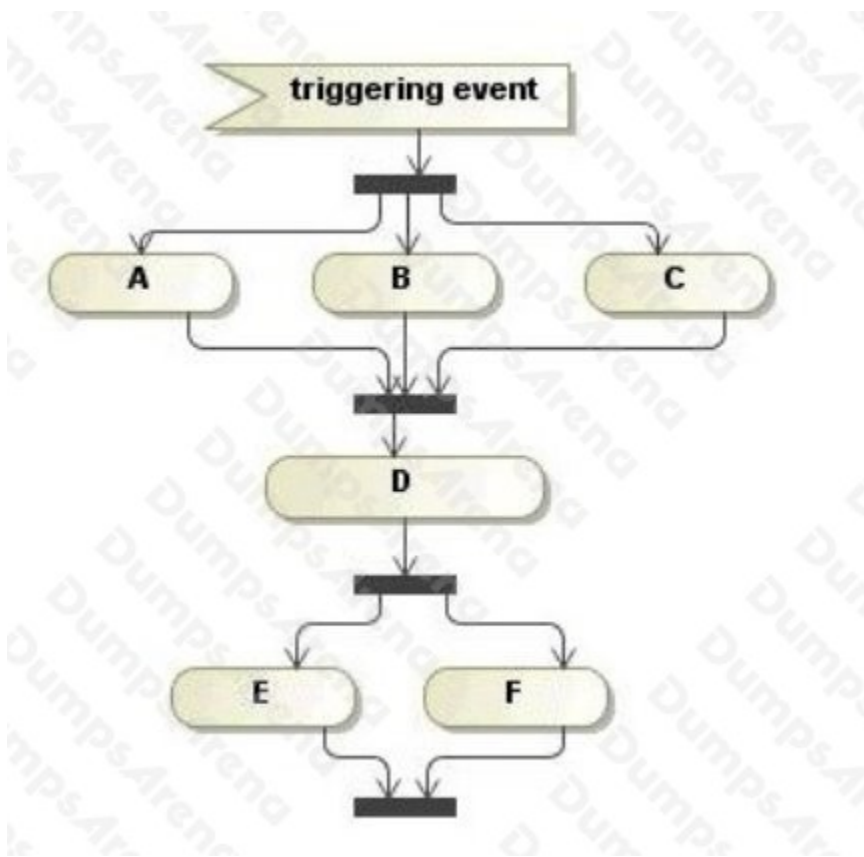

A manufacturer exposes a Web Service to its customers, allowing them to securely place orders. The manufacturer requires that only known parties use the interface. How is the customer's identity established?

- A. by implementing a transactional policy set in ActiveMatrix
- B. by specifying an authentication policy for the Web Service
- C. by sending the message over an SSL-encrypted channel
- D. by implementing strict authorization rules for the service

ANSWER: B

QUESTION NO: 5

Given this process model:

Which three activity sequences could occur? (Choose three.)

- A. A, B, C, D, E, F
- B. C, B, A, D, F, E
- C. B, A, F, D, C, E
- D. B, A, C, D, E, F
- E. B, A, E, D, F, A

ANSWER: A B D

QUESTION NO: 6

What is an important practical benefit of service discovery?

- A. It allows programs to dynamically discover new features as needed.
- B. It allows internal development groups to find functionality that can be reused.
- C. It allows services to discover potential consumers using the UDDI protocol.
- D. It allows governance groups to discover functionality that could become a service.

ANSWER: B

QUESTION NO: 7

Which three factors have the greatest impact on whether a service operation will be able to support different types of service consumers (e.g. multi-channel)? (Choose three.)

- A. throughput demand
- B. requests coming in batches vs. one at a time
- C. availability of the operation
- D. client response time expectations
- E. granularity of the operation

ANSWER: A B D

QUESTION NO: 8

Which three are required in order to determine the feasibility of providing a proposed service? (Choose three.)

- A. service architecture
- B. binding port specification
- C. service interface specification
- D. user interface specification
- E. service utilization scenarios

ANSWER: A C E**QUESTION NO: 9**

Where is a TIBCO ActiveMatrix resource template instantiated?

- A. ActiveMatrix host
- B. ActiveMatrix application
- C. ActiveMatrix node
- D. ActiveMatrix feature

ANSWER: C**QUESTION NO: 10**

Which two component interaction patterns are supported by the Mediation implementation type? (Choose two.)

- A. In-Out
- B. Out-In
- C. In-Only
- D. Out-Only

ANSWER: A C
