**QUESTION NO: 1**

A Backup Administrator configures a backup copy job containing several VMs each of which are backed up by different daily jobs. How many backup files will be created as the result of the initial successful run of the backup copy job? (Choose two.)

- A. One backup file per one VM
- B. One backup file
- C. One backup file per each VM multiplied by the number of existing restore points for the daily backup jobs
- D. It is impossible to create a backup copy job for this setup
- E. One backup file per each existing restore point of the daily backup jobs

**ANSWER: A C****QUESTION NO: 2**

When a Windows server is added to Veeam Backup & Replication using the Add Server Wizard, which components are always installed to the server? (Choose two.)

- A. Veeam Installer Service
- B. Veeam Data Mover Service
- C. Veeam Backup Restful API Service
- D. Veeam Backup Shell

**ANSWER: A B****Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/hyperv/windows\\_server\\_before\\_begin.html?ver=95](https://helpcenter.veeam.com/docs/backup/hyperv/windows_server_before_begin.html?ver=95)

**QUESTION NO: 3**

Which of the following jobs can use a Scale-Out Backup Repository as a target? (Choose two appropriate options)

- A. A backup job
- B. A replication job (for storing replica metadata)
- C. A configuration backup job

- D. A VM copy job
- E. A backup copy job

**ANSWER: A E**

**Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/vsphere/backup\\_repository\\_sobr.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/backup_repository_sobr.html?ver=95)

**QUESTION NO: 4**

When is it NOT possible to use the single-host configuration for SureReplica verification?

- A. When static IP Mapping will be used to verify at least some of the VM replicas
- B. When the VM replicas being verified are on separate ESXi hosts
- C. When the Virtual Lab is created on the same ESXi host where VMs replicas are located
- D. When all the VM replicas being verified are connected to different networks

**ANSWER: B**

**Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/vsphere/surereplica\\_vlab\\_limitations.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/surereplica_vlab_limitations.html?ver=95)

**QUESTION NO: 5**

Which Veeam Backup & Replication architecture component is intended to take the data processing load off the backup server?

- A. Veeam Backup Proxy
- B. Veeam Backup Service
- C. Veeam Cloud Connect
- D. Veeam Installer Service
- E. Veeam Backup Enterprise Manager

**ANSWER: A**

**Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/vsphere/backup\\_proxy.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/backup_proxy.html?ver=95)

**QUESTION NO: 6**

Which recovery verification tests can be executed when verifying both backups and replicas? (Choose three.)

- A. CRC check
- B. Heartbeat test
- C. Application test
- D. Ping test
- E. Hardware test

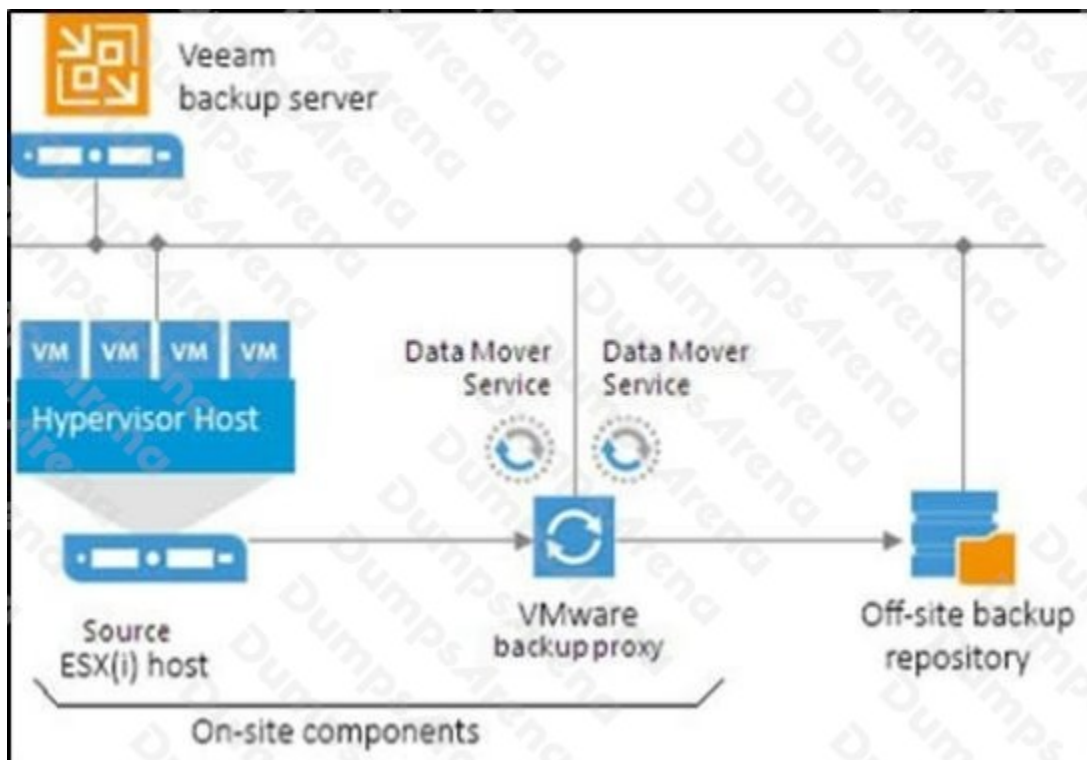

**ANSWER: B C D**

**Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/vsphere/surebackup\\_tests.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/surebackup_tests.html?ver=95)

**QUESTION NO: 7**

Which Veeam Backup & Replication component or service should be added to the scenario below in order to optimize backups to an off-site CIFS share?

- A. In additional backup repository in the remote site

- B. A WAN Accelerator service in the remote location
- C. An additional Data Mover service on the Veeam Backup & Replication server
- D. A Windows-based gateway server in the remote site

**ANSWER: B**

#### QUESTION NO: 8

Which type of jobs can be sent to tape using a "Backup to Tape" job? (Choose two.)

- A. Backup
- B. Backup Copy
- C. Replication
- D. Configuration Backup

**ANSWER: A B**

#### QUESTION NO: 9

A Backup Administrator has setup a Backup Job, utilizing Reverse Incremental backup mode. After the first successful backup, an On-Demand Sandbox is deployed and started. How will the On-Demand Sandbox be affected if the Backup Job is started?

- A. The On-Demand Sandbox will not be affected and the Backup Job will start as scheduled
- B. Veeam Backup & Replication automatically powers off virtual machines in the On-Demand Sandbox/Virtual Lab and stops the SureBackup job immediately
- C. The SureBackup job will fail immediately
- D. The backup job will fail immediately

**ANSWER: B**

#### QUESTION NO: 10

Does the Planned Failover feature shut down the production VM?

- A. A pop-up window prompts the user to choose whether the production VM should shut down
- B. No, but the production VM is temporarily suspended

- C. No, the production VM will keep running
- D. Yes

**ANSWER: D**

**Explanation:**

Reference: <https://www.veeam.com/vm-advanced-replication.html>

**QUESTION NO: 11**

It was decided to set up Veeam Backup & Replication to ensure parallel tasks do not impact production storage availability. Which parameters should be adjusted in the I/O Control section of the menu to do this? (Choose two.)

- A. Throttle I/O of existing tasks at:
- B. Turn off parallel processing at:
- C. Stop assigning new tasks to datastore at:
- D. Stop processing until the latency is lower than:

**ANSWER: A C**

**QUESTION NO: 12**

A Backup Administrator must perform a backup of a VM running a highly-transactional Microsoft SQL Server. Point-in-time database recovery is a requirement.

Which options must the Backup Administrator select in order for the Backup Job to provide the proper level of recovery? (Choose two.)

- A. Enable guest file system indexing
- B. Schedule the job to run every 15 minutes
- C. Backup SQL transaction logs
- D. Enable application-aware processing
- E. Require successful script execution

**ANSWER: C D**

**Explanation:**

Reference: [https://helpcenter.veeam.com/evaluation/backup/vsphere/en/sql\\_backup\\_and\\_restore.html](https://helpcenter.veeam.com/evaluation/backup/vsphere/en/sql_backup_and_restore.html)

QUESTION NO: 13 - (HOTSPOT)

HOTSPOT Match each Veeam ONE component with the correct description of its functions.

Hot Area:

Answer area

Veeam ONE Monitor	Select...
	Creates a categorization model and category values assigned to virtual infrastructure objects
	Collects real-time statistics from connected servers
	Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization
Veeam ONE Reporter	Select...
	Creates a categorization model and category values assigned to virtual infrastructure objects
	Collects real-time statistics from connected servers
	Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization
Veeam ONE Business View	Select...
	Creates a categorization model and category values assigned to virtual infrastructure objects
	Collects real-time statistics from connected servers
	Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization

ANSWER:

## Answer area

Veeam  
ONE  
Monitor

Select...	▼
Creates a categorization model and category values assigned to virtual infrastructure objects	
Collects real-time statistics from connected servers	
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization	

Veeam  
ONE  
Reporter

Select...	▼
Creates a categorization model and category values assigned to virtual infrastructure objects	
Collects real-time statistics from connected servers	
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization	

Veeam  
ONE  
Business  
View

Select...	▼
Creates a categorization model and category values assigned to virtual infrastructure objects	
Collects real-time statistics from connected servers	
Provides information for analysis, decision-making, change tracking, capacity planning and optimization of resource utilization	

## QUESTION NO: 14

A Backup Administrator needs to create an offsite backup job and wants to store the backups on a NFS share at the remote site. Which of the following actions would result in the most optimal configuration?

- A. The scenario is not supported
- B. Place on Veeam Data Mover Service at the production site
- C. Place one Veeam Data Mover Service at the remote site
- D. Mount the NFS share on a Linux server at the remote site, then add the server as a Veeam Backup Repository
- E. Mount the NFS share on a Linux server at the production site, then add the server as a Veeam Backup Repository

ANSWER: D

## QUESTION NO: 15

Is it possible to disable parallel processing for only one replication job configured to use the Direct Data Transfer mode?

- A. Yes, it is possible
- B. No, parallel processing is only applicable to backup jobs

- C. No, parallel processing is a global setting
- D. Yes, it is possible – but only if you configure replica seeding

**ANSWER: C**

**Explanation:**

Reference: [https://helpcenter.veeam.com/docs/backup/vsphere/data\\_processing\\_modes.html?ver=95](https://helpcenter.veeam.com/docs/backup/vsphere/data_processing_modes.html?ver=95)
