Topic Break Down

Topic	No. of Questions
Topic 1, Describe how to configure various settings and host properties	8
Topic 2, Describe how to configure media, volume pools and volume groups	4
Topic 3, Describe how to configure tape and disk storage	7
Topic 4, Describe how to configure and utilize policy attributes	6
Topic 5, Describe how to configure and utilize policy scheduling	0
Topic 6, Describe how to configure policy clients and backup selections	3
Topic 7, Explain how to implement specialized backup solutions	10
Topic 8, Describe the function, uses, and administration of deduplication	10
Topic 9, Describe how to perform catalog backup configuration tasks	2
Topic 10, Describe how to obtain and install NetBackup release updates	3
Topic 11, Describe media and image retention concepts	7
Topic 12, Describe how to manage disk storage, tape devices and tape media	8
Topic 13, Interpret available reports to verify and monitor NetBackup	4
Topic 14, Describe how and when to run backup and deduplication jobs	4
Topic 15, Describe how to initiate, prioritize, and monitor restore jobs	3
Topic 16, Analyze, optimize, and tune NetBackup	5
Topic 17, Interpret status codes and job details	6
Topic 18, , Troubleshoot devices and media	7
Topic 19, Troubleshoot common issues related to disaster recovery	17
Total	116

QUESTION NO: 1

What should an administrator do to enable backups to span multiple BasicDisk storage units?

- A. configure a storage unit group and add BasicDisk storage units from multiple Media Servers
- B. configure a storage unit group that consists only of disk storage units defined on a single Media Server
- C. confirm that a load balancing storage unit is selected at the group level
- D. select Storage Units > Storage Unit > Allow backup to span disks

ANSWER: B**QUESTION NO: 2**

Which scenario accurately describes the creation of a full synthetic backup using tape?

- A. a single drive can be used for both the read and write of the backup
- B. a separate read drive and write drive can be used on the same Media Server
- C. a read and write drive can be used on different Media Servers
- D. a disk storage unit must be used prior to copying the backup to tape

ANSWER: B**QUESTION NO: 3**

Which two actions should an administrator take to allow NetBackup to manage the allocation of volumes to volume pools?
(Select two.)

- A. define a scratch pool and add all of the volumes to it so NetBackup will move volumes to the other pools as volumes are needed
- B. assign volumes to all volume pools as required in the environment
- C. define a scratch pool with assigned volumes so NetBackup will move the assigned volumes to other pools as volumes are needed
- D. create volume pools as required, but refrain from adding volumes to the pools
- E. assign volumes to NetBackup and DataStore volume pools so NetBackup will move the assigned volumes to other pools as volumes are needed

ANSWER: A D

QUESTION NO: 4

Which volume pool must be manually created in NetBackup?

- A. NetBackup
- B. DataStore
- C. Scratch
- D. CatalogBackup

ANSWER: C

QUESTION NO: 5

A tape library had the robot firmware upgraded and now the robot is reading the barcodes with additional characters. How should an administrator enable NetBackup 7.7 to use the same characters as before the firmware upgrade occurred?

- A. update the Media ID Generation setting
- B. update Media settings
- C. update Device mappings
- D. update the Barcode Rules setting

ANSWER: A

QUESTION NO: 6

Which two appliance performance scenarios benefit from seeding the MSDP pool? (Select two.)

- A. new client backups over WAN
- B. new application backups over SAN
- C. new VADP VMWare backups using Media Server as the backup host
- D. new replication to a new DR site
- E. new clients with large file systems containing small files

ANSWER: A D

QUESTION NO: 7

What are two possible causes for job failure when a Windows policy is configured to use Accelerator? (Select two.)

- A. client-side deduplication is disabled
- B. use of the NTFS Change Journal is disabled
- C. the backup target is AdvancedDisk
- D. insufficient space in the NetBackup installation directory
- E. the policy lacks a forced rescan schedule

ANSWER: C D

QUESTION NO: 8

Which two storage unit types can be configured in NetBackup? (Select two.)

- A. deduplication
- B. NDMP
- C. robot
- D. media manager
- E. tape

ANSWER: B D

QUESTION NO: 9

A NetBackup Master Server has commenced writing four long-running duplication jobs on an AdvancedDisk disk pool. The value of Maximum concurrent jobs for the storage unit and Limit I/O streams for the disk pool are both set to 4.

There are 35 jobs queued on the Master Server that require this disk pool:

5 replication jobs with priority 9999

10 backup jobs with priority 999

20 duplication jobs with priority 99

Two restore jobs that require this disk pool are then submitted with default priority.

Which job type goes active next?

- A. Backup
- B. Duplication
- C. Replication
- D. Restore

ANSWER: D

QUESTION NO: 10

Which two prerequisites must an administrator perform to enable restoration of individual objects and attributes in Active Directory? (Select two.)

- A. install the NetBackup File System daemon (nbfsd) on the client
- B. choose the "Enable granular recovery" option in the policy
- C. choose the "Use Accelerator" option in the policy
- D. choose Active Directory policy type
- E. enable the Network File System (NFS) on the client

ANSWER: B E
